Description

Libre Expert offers its product **Libre OS USB**, a dedicated GNU / Linux system bootable for Usb devices with **persistence of settings and encryption of personal data**. The product is designed for **PCs with 64-bit processors**, the interface is in **English by default but can be changed to any language in a few clicks**. This product evolves with the updates coming from Ubuntu and also according to improvements desired by users , the proposed model is currently **based on Ubuntu MATE 17.04 for version 5.0 of the system**.

Your key / disc only a few grams can become **your traveling office** ! Connect it on any compatible machine and start the Libre OS USB operating system from your USB device, and you will have a modern and fast desktop environment capable of connecting to the Internet with all common tools ! Thanks to the **persistence of data your settings are retained and your data too!** You can also add software just as on an ordinary Ubuntu installation !

Also useful if you have a dysfunctional computer, using this key **go to your drives and recover your data easily!**

Ideal also for **entertainment** since a dozen classic and **friendly games** are pre-installed, or to **work on your documents** with office software!

Your key / drive is capable of booting both **UEFI / Secure Boot** (New generation of computers since Windows 8) and in **Classic Mode (Legacy / CSM)** while maintaining data persistence .

The personal data of the user's home directory are automatically encrypted by the Linux kernel and these will only be accessible after entering the user's password. This is to secure its data in case of loss or theft of your USB device.

The system is **based on Ubuntu MATE a derivative of Ubuntu** (The most famous Linux in recent years) with the advantage of being **lightweight, complete and fast** to work everywhere!

Are preinstalled or potentially installable on the Libre OS USB key among others these softwares :

- Browsers **Google Chrome(downloadable)** and **Firefox**
- Many Internet tools (**Thunderbird**, **Skype downloadable**, **Filezilla**, **Bittorent**, **Pidgin**, **Teamviewer downloadable...**)
- Encryption of your home folder with **Encfs**
- Ability to synchronize your data with a **cloud service (ownCloud, Dropbox, ...)**
- Many classical games (**Sudoku**, **Mahjong**, **Solitaire**, **Chess**, ...)
- Full office suite **LibreOffice**
- Music and video player **VLC**
- Editing and audio recording with **Audacity**
- Photo editing with **The GIMP**, drawing with **Inkscape (downloadable)** , **Simple Scan** to scan your documents and **Cheese** for using the webcam
- **CD-Audio ripping** and **burning**
- Partitioning tool with **GParted**
- File manager with **Caja**
- **Wine** (downloadable) to use specific **Windows programs** under Linux

We choose quality by **ensuring that tool for 3 years.**
